

HTML 101

By Scott Faranello / Webanello Inc.

Learning HTML is the first and most important step to take in understanding web design, programming and the basis for how the World Wide Web works. There are many books written on the subject and new standard have recently been released that incorporate even more functionality to your web pages.

The following list attempts to pick out a few good books and sites to help you get started:

Books:

- [HTML: Visual QuickStart Guide \(5th Edition\)](#)

Links: (copy and paste the web addresses into your browser)

- [Web Monkey - HTML Basics](#)
<http://hotwired.lycos.com/webmonkey/96/53/index0a.html?tw=authoring>
- [HTML 101 - A 10 Week HTML Training Course](#)
http://webdesign.about.com/library/beginning/bl_htmlclass.htm
- [Writing HTML - A Tutorial for Creating Web Pages](#)
<http://www.mcli.dist.maricopa.edu/tut/lessons.html>

The information on these sites is basically the same. The method of teaching may vary. Use the one that work best for you. But pick one and stick with it. With a little time and effort, you'll soon be putting your ideas on the web for the world to see.
